

Database Design

Database: PostgreSQL

Table: users

Column	Type
id	UUID
email	VARCHAR
password	VARCHAR
role	VARCHAR
created_at	TIMESTAMP

Table: chats

Column	Type
id	UUID
user_id	UUID
title	VARCHAR
created_at	TIMESTAMP

Table: messages

Column	Type
id	UUID
chat_id	UUID
role	VARCHAR
content	TEXT

Column	Type
created_at	TIMESTAMP

Table: documents

Column	Type
id	UUID
user_id	UUID
file_name	VARCHAR
file_path	VARCHAR
uploaded_at	TIMESTAMP

Table: document_chunks

Column	Type
id	UUID
document_id	UUID
chunk_text	TEXT
embedding_id	VARCHAR

Relationships

User → Chats

One user can have multiple chats.

users.id → chats.user_id

Chat → Messages

One chat contains many messages.

```
chats.id → messages.chat_id
```

Document → Chunks

One document contains many chunks.

```
documents.id → document_chunks.document_id
```

Future Tables

Later phases may add:

- memories
- tool_logs
- ai_metrics
- user_preferences
